The first two thirds of this book is a well-written and  
thorough critique of the technological. Others have commented  
on this as well, James Burke raises the issue in one of his  
series either The Day the Universe Changed or Connections 2 as  
I recall noting the difference between European and Asian  
philosophies, particularly in India.

While there are still goods being delivered and many of them are, in fact, quite  
Our ability to develop and use tools that make our lives  
easier is part of our DNA, which makes technological progress  
an inevitability. Individuals in our society generally lack  
the freedom of public speech, which is effectively reserved,  
as mentioned above, to those who can pay for it.  
The first waves of news concerning any technical innovation are invariably  
to Book Page. His discussion of autonomous technology that  
it's independent of the actors deciding on its course and  
technological imperative "If we can do it, we must do it.
