However, as digital products are increasingly used in health research and clinical care, all relevant stakeholders have a collective responsibility to think proactively about how to conduct digital health research ethically and responsibly. Determining risk of harm is a somewhat subjective process, yet worth breaking. With that in mind, including end users in the development process who represent a wide cross-section of our society is one way we can be responsive to the principle of justice.

With the introduction of connected technologies, there have also been atten
