This book explains what is wrong with the traditional methodology of "inductive" reasoning and shows that the alternative scheme of reasoning associated with Whewell, Pierce and Popper can give the scientist a useful insight into the way he thinks. This volume provides a rigorous interpretation that portrays science and religion in their actualities as personal, communal and cultural phenomena involving different concerns, conceptions and modes of inquiry. Taking a radical interpretation of the Kuhnian concept of paradigm incommensurability, the authors begin by discussing the difficulties of gaining access to the ideas of communities with different rational categories, and then define the subject area of parapsychology,...
