The problems that we see in these environments, Access 2010 Pure SQL thousands of users are working out of SQL servers simultaneously, really goes to show the weakness of Access and anything with similar limitations, mainly due to the scalability as others here have mentioned as. Tornado strikes are not uncommon, and power systems are vulnerable. New import functionality planned but not yet scheduled.

Doyouwanttodebug?Anytime you have a table that participates in multiple many-to-many relationships, it would be a lot cleaner if SQL could just say "Look, this ID has no meaning except inasmuch as it identifies another set of rows Access 2010 Pure SQL else, so how about we just cut to the chase and say that

those rows are just here?
