For large stretches of lawn, it is often best to install a multi-flow system, essentially multiple French drains dug deeper into the earth. This weakens the turf and makes it more susceptible to insect and disease damage and to weed invasion. The IWW advocated for direct action and, in particular, the general strike, and almost a quarter-century ago, it became clear to me and others that inclusive development could not be imagined without incorporating diversified, decentralized, and distributed sources of solutions developed by local people, on their own, without outside help. Turf that does not respond to nitrogen fertilizer may be lacking in other nutrients, such as phosphorus or iron. Modern cities are known for creating their own microclimates due to concrete asphalt and other artificial surfaces, which heat up in sunlight and channel rainwater into underground ducts. That change can happen if residents push for it. Choose a sprinkler that best fits the size and shape of your lawn.
